IL MONDO
DELL'
OTTICA

Endorsement of
IL MONDO DELL'OTTICA N. 57

THEO GOES WILD!

The new signature **Theo** mini collection comes with a pun attached. Its name is Water-l'eau and it comprises original titanium shapes, accentuated by vibrant colour combinations which certainly don't go unnoticed.

LINDBERG: CONNUBIO DI STILE!

The *Lindberg Horn* collection, created by the renowned Danish brand, is worked on entirely by hand and offers an exclusive combination of buffalo horn and titanium. This attractive union fuses tradition and future in a unique style. The front of the frame is made of layers of laminated horn, while the arms and hinges are adjustable titanium for the perfect fit. Both materials are lightweight and hypoallergenic to guarantee complete comfort.

DETECTIVE INSPIRATION FOR ANDY WOLF

Agatha Christie, Lieutenant Columbo, Miss Marple...some of detective novels' most well-known inspectors have inspired the summer collection of the Austrian brand **Andy Wolf**. Their glasses and sunglasses are endowed with a touch of intrigue and irony, as well as an elegant retro style.

L'ELEGANZA CHE SI TOCCA: TAVAT

Beautiful sophistication and simple function combine to tell the story of the new collection offered by **Tavat**: Tactile Collection. The luxury frames express a love of nature and architecture with their unique detail - a jewelled hinge, simple but effective in its form and discernible to the touch.
